Bill Nittler  
Box 112  
Englewood, Colorado 80110

Dear Mr. Nittler:

We received your letter, with great interest, this morning. You must, indeed, have a remarkable receiver as we are only 250 watts after sunset.

As to confirming our exact programming, it is a bit difficult as we are an automated station and use a tape logger, however, the information you sent is plausible and the announcements and station identification are those we do use in normal programming.

I am considering using your letter in my sales promotion. We have potential advertisers who do not use evening advertising as they say our night time signal "scarsely reaches the edge of town". You have provided me with an excellent argument.

Many thanks for your good wishes.

Regards,

  
Sam Blessing  
General Manager
