Dear Bill,

Thank you very much for your DX report. KJMM-580 returned to the air in late July after having been dark for more than five years. The previous call letters were KIKX and prior to that, KTAN. The frequency was first licensed by the FCC in 1949 and in part was owned by Erskine Caldwell. I worked for the station as an announcer back in the early 60s'.

This letter serves to confirm that you indeed did log our signal and program content at the time reported. At that time we were still on our daytime, 5000 watt, non-directional pattern. Our major prior protection is to KMJ, Fresno, Ca. The original antenna array is still in place, but we replaced all of the equipment up to the transmitter before we went on the air.

Thank you again for your report, and perhaps, we'll hear from you regarding our nighttime directional coverage at 500 watts directional.

sincerely,

Rich Heatley
