MEMORANDUM

DATE: March 26, 2003
TO: Mr. Bill Nittler
FROM: John Timm, General Manager
RE: QSL request.

Bill,

This is to verify reception of radio station KKNT at 5:33 P.M. MST on 10-17-02. For your information, KKNT operates at 960 Khz with 5,000 watts day and night, using a Harris SX 5 transmitter fed into a four tower 5/8 wave array.

Have been a long-time DX-er myself, although more active in FM than AM. Please e-mail to acknowledge receipt.

John Timm
