

1510 KNTS/ **RADIO** abc

July 1, 1985

Bill Nittler
Box 824
Mancos, CO 81328

Dear Bill,

Thank you for your reception report dated June 16, 1985. The events listed on your log do match our program log. KNTS/ABC Talkradio operates on 1510 KHz at 10,000 Watts of power. The studios are located at 65 East First Ave., and the transmitter is at Southern Avenue and Country Club drive in Mesa. I'm sorry that we do not have an official QSL card, but I hope this letter and the other materials sent will be some help to you.

In case you are interested, we are presently broadcasting with a Continental B-316 transmitter. The tower is 170 feet tall. The station is licensed to the Mesa community. During the day, we run ABC Talkradio programming, but during the early morning and late evening hours we provide news and features geared to the mesa community as well as an outlet for San Diego Padres baseball.

Again, Thank You and keep listening, when you can pick us up.

Happy DXing.

Gary Jacques
Chief Engineer
