

KPGE RADIO
Page, Ariz.

Dear Maurice,

Receiving your letter stating that you received our test signal of January 4 it is my pleasure to inform you that the station was on the air at the time specified in your letter.

KPGE is a 1,000 watt daytime station with 250 watts authorized at night. We were using 1,000 watts on the date mentioned however since we have been having some transmitter trouble and our monitoring station did not pick us up the previous month.

You may find it of interest that two of your fellow IRCA members also wrote of there hearing our signal. The two who wrote were : David Johnson of 8263 E. Mansfield, Denver, Colorado and Wayne Coombs, Jr. of 859 East Center Street, Bountiful, Utah,

Best wisner from our station, and good luck in your hobby

Sincerely

C. L. Eckersley
Chief Engineer
