KZON Radio - 1190 on your dial

GLENDALE BROADCASTING COMPANY

E. O. SMITH, PRESIDENT

POST OFFICE BOX 926 • PHOENIX, ARIZONA • YELLOWSTONE 9-6202

7 March 1961

Mr. Maurice W. Nittler
3663 So. Clarkson
Englewood, Colorado

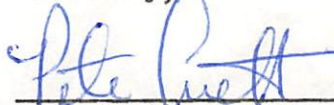

Dear Mr. Nittler:

Thank you very much for your letter reporting reception of our signal. I apologize for the delay in answering, as it did not come to my attention until today. Apparently it was buried among other correspondence, and was forgotten.

The KZON transmitter is a Collins 300J 250-100 Watt AM Broadcast rig, and feeds a two tower directional array, which radiates our RF off into space, northeast and southwest. We operate 19 hours a day, with 250 watts and the same pattern at all times.

Thanks again for writing us. I enclose a coverage map, which shows our pattern. We hope you'll hear our signal again sometime. 'Til then, again thanks, and 73's - - -

Sincerely,

Pete Cuett
Radio Station KZON
