

CKDA 1200

AM Radio

October 29, 1987

Dear Bill:

It is with pleasure that we confirm your reception of 1200 CKDA.

We have a vast coverage area and have received many reception letters, like yours, from literally all over the world. This, of course, is depending on the atmospheric conditions.

For your interest and information our frequency was changed from 1220 to 1200 on July 1, 1986. CKDA now broadcasts on 1200 Khz with a continuous power of 50 000 watts. We have a three tower array that broadcasts 24 hours a day. The array is located at Longitude $123^{\circ} 14' 53''$ West and Latitude $48^{\circ} 26' 02''$ North, and oriented to 315° .

We have enclosed some station logos, prize patches and paraphernalia for you. Thank you for your letter and we hope you will be able to tune us in again.

Yours truly,

1200 CKDA
