Mr. Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Sir;

It was nice to receive your report and the comments on reception in your area on K D A Y's DX program on the morning of November 26th, 1956. We received over 60 reports from 22 states, Canada and New Zealand. The overall weather conditions in the U.S.A. at the time of broadcast was not very favorable but our signals were heard clear across the nation and the 8 reports from New Zealand made the staff at K D A Y very happy, indeed. The response from NRC members was fine and the type of reports were way above average as compared to other reports I have seen at other radiostations in the past 3 years or so.

I checked your report and the items you listed from 12:02 to 12:24 A.M. PST on November 26, 1956 were correct and it gives me great pleasure to verify your report for the time and date above.

Our furthest verified report was from Howard Kemp of Laconia, New Hampshire. However, that was in the U.S.A. All 8 reports from New Zealand were correct.

We thank you again for your report. Also for your comments on reception.

Sincerely,
Hank Wilkinson
