March 17, 2004

Dear Bill,

I'm sorry it has taken so long to reply to your reception report of station KHTS.

A review of the information provided in your letter agrees with the station's program log and therefore I can confirm that on January 12, 2004 at 9:55 PM PST you did, indeed receive KHTS, Santa Clarita (formerly Canyon Country) California.

The fact that you received KHTS is remarkable as the station operates with only 500 watts nighttime and the three-tower array does not put much energy in your direction.

Thanks so much for taking the time to let us know of your reception.

Very truly yours,

Jerry Lewine, K6QU
Chief Engineer
