Mr. Bill Nittler  
P. O. Box 112  
Englewood, Colorado 80110

Dear Mr. Nittler:

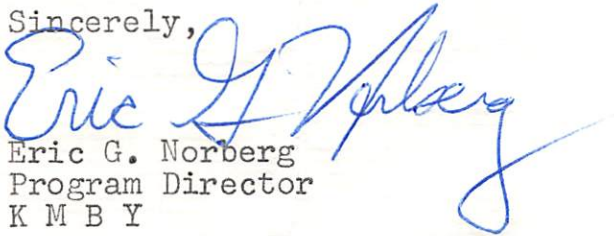

Thank you very much for your reception report! On that after-midnight program early Monday morning, when everyone else is down for maintenance, we do seem to get out...but most of our reports come from the north...particularly mid- and western Canada. Our tower is on the waterfront, with mountains to the south, southwest, and a bit to the southeast, and so our signal seems to "squirt" north even though we are not directional. And our saltwater ground seems to add to our coverage in all directions.

I believe, however, that yours is the furthest east we have ever received. At any rate, I can positively confirm from the information you provide that you did, indeed, receive KMBY.

I enclose a coverage map which contains the technical data, except that we operate nighttime with 250 watts power.

Thanks again for your report. Good DXing.

Sincerely,

  
Eric G. Norberg  
Program Director
