Maurice NW Nittler
3663 So. Clarkson
Englewood, Colorado

Dear Sir:

Received your report of reception a couple of days ago. Wish I could say that we get there consistently with our 250 Watts, but unfortunately I can only say that it is a freak reception. The skip must bounce right into that area as we have had reports from Denver just about that time of day that you logged us. Your report is accurate according to ~~you~~ our log for that day.

We play only C & W music and are the only station in this part of California that does.

Thank you very much for your interest in our station.

Yours truly,

Hal Engebretson
Chief Engineer
