

Mr. Bill Nittler
Box 824
Mancos, Colorado 81328

Dear Bill,

Thanks very much for your reception report of October 6, 1986 in Mancos on your Hammarlunds HQ-180 with loop antenna.

Your log indicates that you were indeed receiving KSMJ, Sacramento on 1380 khz. At the time you received us, we were operating a Harris MW5A five kilowatt transmitter with a four tower directional antenna system located just west of Sacramento, California. You received us off the "backside" of the antenna, since the main lobe of radiation is towards the southwest.

We always appreciate reception reports, and hope that you enjoy your long distance listening. I hope things are going well for you in Mancos.

Sincerely,

Chip Morgan
Chief Engineer
KSMJ/KSFM
Sacramento, California
