Dear Mr. Nittler:

This is to verify your reception of Radio Station KVEC,
San Luis Obispo, California, on November 9, 1958.

You may be interested to know that weather conditions
must have been good, because at approximately the same
time November 9, we were also received in Vancouver
B. C.

As you know we operate on 920 kilocycles. Our power is 1000
watts daytime, 500 watts night time. We use an RCA
BTA - IM transmitter. Our radiation is non-directional.

Thank you for your letter and interest.

Cordially,

Charles Mitchell, C.E.

Charles Mitchell
