

Radio Station

KX-RX *dial 1500*

Mr. _____

P. O. BOX 167
SAN JOSE, CALIFORNIA
TELEPHONE CYPRESS 2-5080

Dear Sir:

This is to confirm your reception report of 10/8/58.
Your report has been checked against our records and has
been found to be substantially accurate.

KX-RX operates as a twenty-four hour station on the
clear channel of 1500 KC/S with a power of 1000 watts day
and night. We radiate in such a manner that we produce very
little signal strength in the direction 61° North from San
Jose, consequently reception of our signals in the Eastern
United States is difficult. The equipment in use at present
is an RCA BTA 1-L Transmitter, a 76B RCA Console, and a two
tower directional antenna system.

Again, we are pleased to confirm your report and express
our thanks for your interest in our operation.

Yours truly

Chief Engineer
