Mr. Maurice W. Nittler,
3663 S. Clarkson,
Englewood, Colorado

Dear Sir:

Thank you for your note concerning reception of KCMS-AM, 1490 kc, 100 watts. The data supplied indicates that you did hear the station at 1:00 am, January 15, 1961.

It is rather surprising that you heard the station since KBOL in Boulder is somuch closer and has 250 watts.

Attached is a program schedule, while the AM is out of the question, you will find we have an excellant FM signal over the entire Denver area. We have a number of listeners in Greeley.

Thank you,

C. M. Edmonds,
chief engineer
