

Spectrum Radio

P.O. Box 1450, Silverton Colo. 81433

1450 KHz. on the AM dial

August 19, 1981

Dear Bill:

Thank you for your report of reception of KDRW on August 14, 1981. This will confirm you did indeed hear our signal and programming!

As a new station in the San Juan Mountains, we appreciate very much the reception report. We did not expect to be heard in Nucla - our target areas are Silverton, Ouray and Telluride, and all of San Juan County.

Our first day of broadcasting was August 3, 1981, although we were on the air testing on August 2 for several hours. If you are ever over this way, feel free to drop in for a visit. Office hours are 9 to 5, and broadcasting hours are 6am to midnight.

Conf: Broadcast 12:22 pm MDT, August 14, 1981.

Power: Day, 1000 watts, night, 250 watts

Antenna: 160 ft tower located 1/4 mile NE of Silverton

Studio location: 1202 Greene St (rear of Benson Hotel) Silverton.

Frequency: 1450 KHz.

Again, thanks for the report - it helped us a lot!!!

Sincerely,

Ed Brooks
Program Director/Chief Engineer
