4411 GOODNIGHT AVE., PUEBLO, COLORADO

November 26th 1957

Mr. Maurice W. Nittler,  
2818 South Cherokee St.  
Englewood, Colo.

Dear Mr. Nittler:

Yours of November 19th received, and we are pleased to verify your report of reception to our broadcast of that date, on the occasion of our monthly equipment check.

I live just a little way from you, at 2725 South Penn. I spend two days a week in Pueblo, and the rest of each week I am in Englewood. I pick up KFEL very well during the daytime hours on a GE clock radio in my home. The antenna is in the back of the set and I turn the antenna so as to minimize the signals from KLIR at 990 kc and KIMN at 950. I cannot get K F E L very well in the early morning because of KJLT at North Platte which is a 5 kw station on 970. After the sun is up however it comes in quite well.

Thank you for your letter.

Cordially,

K F E L, Inc.
