Bill,

It was great to get your DX report ! Sorry about missing your last one.

We are paying special attention to DX reports since our frequency change from 760 KHZ to 1150 KHZ. Our Hispanic programming is now in heavy competition with two local station and our daytime power is a great advantage.

Although I realize your reception is from skywave it is a great sales advantage to receive these DX reports from around the state. If you have time I would be interested in hearing from you on the day to day reception of KFRR in the Cortez area (if any).

Once again, thank you for your patience in receiving KJIM verification, and for your new KFRR report.

Sincerely,

Mark Petersen
