Mancos, CO 81328

Dear Bill:

This will certify that at 12:39 and 12:40AM on January 23, 1989, we did indeed broadcast as per your letter. We're very pleased you picked us up and even more pleased with your letter.

Our signal is 1000 watts directional at night on 1350 Kilohertz. You are probably right in your assumption on the interference, since our directional protection is for the stations south of us.

Thanks for your letter.

Yours truly,

Martec Communications Corp.
