3663 south Clarkson
Englewood, Colorado

Dear Maurice

This is to confirm your reception of WLCY radio on 10/31/60 at 0532-0536 EST. We have found your report to be entirely accurate.

WLCY is located on Gandy Boulevard, midway between Tampa and St. Petersburg. WLCY broadcasts day and night with 5000 watts power. We use an RCA BTA-5F transmitter feeding a 449 foot vertical tower. During night operation we add two 182 foot antennas to the pattern for a three tower directional array. Gates and Collins equipment is used in our three studios.

Your reception report has been very helpful to us. Should you ever visit our area, may we extend a personal invitation for you to visit our studios and transmitter.

Very truly yours,

WLCY Radio
D. E. Kimberlin, Ass't Chief Engineer

P.S. Are you any relation to Francis Nittler of Denver? We have a report of th same date from him.
