Mr. Maurice W. Nittler
4580 South Julian
Englewood, Colorado
80110

Dear friend Nittler:

It's always a pleasure to hear from guys across the country and around the world ... and I mean just that. On a previous "test" we received two separate reports from different section of New Zealand .. very good reception ... naturally, our good buddy ~~XERF~~ was not operating at the time.

I'm happy to report that your logging corresponds with our test material.

We operate a Gates BC-1T transmitter with antenna 154 feet situated in a valley immediately encased on three sides with mountainous terrain with mountains some three air-line miles on the fourth side. Weather conditions here at the time .. clear with temperature hovering in the high teens.

Many thanks for your report and a happy Holiday Season to you and yours.

Sincerely,

Carroll S. Lee, Mgr.,
Radio Station WGHC
