Mr. Maurice W. Nittler
2818 S. Cherokee
Englewood, Colorado

Dear Sir:

This is to verify your reception report of WRFC on February 2, 1959 at 5:35 A.M. EST. Your interesting report was greatly appreciated. The fact that you received us after 5:30 is particularly interesting as interference builds up so much at that time. No doubt your loop antenna was the biggest factor in making reception possible. In case any of your friends are interested in logging us; we sign-on at 5:00 A.M. EST. I'm certain reception at that time will be much easier.

Thanks again for the report and best DX to you.

Yours very truly,

L. D. Drewry
Chief Engr.
