Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Maurice,

I'm most happy to confirm your report of reception of our station. We operate on a power of 250 watts with a frequency response of 30-15,000 flats. Our towers and studios are located in the Nisha Valley, directly to the north of Atlantic.

The tower that you saw directly to the west of Atlantic on Hiway 6, was a tower for the Iowa Highway patrol, and the one in downtown Atlantic was for the local poice and the sherriff.

Sincerely,

KJAN Radio
