OCTOBER 18, 1954

Mr. Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Mr. Nittler:

After much delay while we attended to the many more pressing duties of a new station, here is verification of your reception reported September 30, 1954. Your report agrees with our logs, as we conducted a test transmission at that time, although I don't recall now the purpose. We went on the air with regular programming on Sept 21.

We appreciate DX reports, and will make every effort to send verifications, even if belated.

Incidentally, we received a report for another test transmission from a Francis H. Nittler, of Denver-- which is quite a coincidence, since the two reports are the only DX reports we have received to date.

Thank you for your best wishes, and good luck to you in your DX'ing.

Sincerely,

Bob Coddington
