

K I G A

NORTHERN IOWA'S FARM AND FAMILY RADIO STATION

5000 WATTS 1600 KC • ALGONA, IOWA • PHONE 876

July 21, 1956

Mr. Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Mr. Nittler:

Thank you very much for your reception report of KIGA on July 7, 1956.

Your report is correct as near as we can determine.

KIGA, as you probably gathered is a brand new 5kw station on 1600 kc. We are a 2 tower directional beaming 330 degrees true north. However when you received us we were operating with only one antenna . non-directional.

We just completed our proof of performance last night. so we hope to get our authorization to broadcast daily soon.

Once again thanks for your report.

Sincerely,

James J. Wehner
Manager and Chf. Eng.
Radio Station KIGA

*P.S. We also were DX'ed by your
Brother in Denver.*

"IOWA'S NEWEST AND MOST POWERFUL INDEPENDENT RADIO STATION"
