Mr. Bill Nittler:

We were very pleased to receive your letter concerning your reception of our station on the 24th of October. Evidently your reception was rather good because we checked back into our records, and discovered that just about every bit of information that you heard was correct. The only thing that was wrong was my name, you had it as Tom Conely, it is Tom Conrad, but being that far out I can easily see how it could be misunderstood. In regards to you being able to pick us up in southwest Nebraska is very surprising to say the least even though you evidently have very fine equipment. We operate at a power of only 250 Watts and a frequency of 1080 Kc. so it was really surprising to us that you could even get a faint signal. At this time there are two men that working for us that previously had worked in Falls City, Nebraska and they were completely awe struck at your letter. The station of which they came from was at one time affiliated with one in McCook. If you ever happen to hear us again I would surly be interseted in learning of it, and if you are ever in the area feel free to stop by and see us.

Sincerely yours,

Tom M. Conrad
