Maurice W. Nittler
Box 94
Geneva Nebraska

Dear Maurice:

This is to verify your reception report of KTRI on the Morning of November 30, 1956.

Our normal daytime signal extends to about Omaha. I would imagine that at various times of good reception it would be possible to pick us up faintly there in Geneva. Our night pattern cuts off sharply in that direction so it would be nearly impossible to catch us during the night time hours. Might try once in awhile just for fun tho.

Thanking you again for your reception report.

With Best Wishes, Always,

I Remain,

Sam Seldon Ch. Engineer.
