IOWA'S FINEST FREQUENCY

PARAMOUNT THEATRE BUILDING  
CEDAR RAPIDS, IOWA

July 14, 1956

Maurice W. Nittler  
Box 94  
Geneva, Nebraska

Dear Maurice Nittler:

We appreciate very much your report on the reception of WMT. We have checked our program log and find that the details of programming as recorded by you were verified.

WMT operates on a frequency of 600 KC with a power of 5,000 watts day and night; Monday - Saturday from 5:00 a. m. to 1:00 a. m. and on Sundays from 6:30 a. m. to 12 midnight.

Each Wednesday at 1:00 a. m., we make a frequency response test for persons wishing to check their receivers, particularly high fidelity receivers. The frequencies transmitted are from 50 through 10,000 cycles per second. The test is accompanied by voice explanation of the procedure to be used.

Yours very truly,

RADIO STATION WMT
