Dear Bill,

This will confirm your reception of WGLC on the morning of March 13, 1967. Congradulations, I am told that this is a valuable DX.

Your comrads from the National Radio Club are constantly after us to set up a regular schedual of testing so that you fellas can copy us.

WGLC operates at 250 watts undirectional daytime. Enclosed is our certified coverage map. How ever as you have found out, we get out like a "bomb" on frequency.

Sincerely,

Robert C. Beamish
Manager

RCB/jd
