January 31, 1969

Mr. Bill Nittler
Box 112
Englewood, Colorado
80110

Dear Mr. Nittler:

Thank you for your report of reception of WQUA on January 27, 1969. Upon checking our logs, we find that your report is accurate.

WQUA operates on 1230 kcs. with a daytime power of 250 watts. Our transmitter is a Collins model 820-D, with a pair of 5-500 tubes in the final power amplifier. The antenna is $\frac{1}{4}$ wavelength (208 feet) shunt-fed self supporting tower, providing a non-directional pattern.

WQUA's normal operating schedule is 24 hours daily, with the exception of midnight to 5:00 a.m. on Monday mornings, which is reserved for transmitter and studio maintenance. We invite you to listen for WQUA in the future and we would appreciate receiving your signal and reception reports. Should you ever happen to be in our area, please stop by for a tour of our new facilities.

Sincerely,

A handwritten signature in black ink that reads 'Dave Barquist'.

Dave Barquist
Assistant Chief Engineer
WQUA Radio
