Mr Bill Nittler  
108 El Mundo Rd  
Belen, NM 87002

Dear Mr. Nittler:

WSCR radio is pleased to acknowledge your reception report dated November 1, 2006 . Thank you for your report. We are always interested in reception reports from afar.

WSCR, formerly WMAQ, transmits from suburban Chicago, Illinois, USA with a power of 50,000 watts at 670 Kilohertz. Our main tower is 740 feet tall. We have 3 transmitters. Our main is a Harris 3DX50, our standby is a Continental 317C and our emergency backup is a RCA-5R1 5 kilowatt transmitter.

Originally licensed in 1922, WMAQ became, by default, Chicago's oldest radio station in 1934 when Westinghouse transferred the license of KYW to Philadelphia. (WGN remained---and still remains---the city's oldest station under its original ownership.) WMAQ celebrated its seventy-fifth anniversary in 1997. WMAQ was originally licensed to the Chicago Daily News and the Fair Store (a Loop department store). The station was purchased by NBC in 1931 (the network's second Chicago acquisition) and remained a key NBC owned-and-operated station until General Electric (which purchased RCA, NBC's parent, in 1985) sold it to Group W on February 1st, 1988. In 1996 the company changed its name to CBS Corporation, and with the spin-off of the radio division, we are now CBS radio, still wholly owned by CBS.

On August 1, 2000, WSCR another Infinity property, assumed the frequency of 670Khz and the call-letters WMAQ were permanently retired, reverting to NBC. On October 15, 2001, WSCR moved into the renovated studios of WMAQ Radio, located at NBC Tower, Chicago.

Thank you for your interest in WSCR.

A handwritten signature in black ink, appearing to read 'GD' with a long horizontal flourish extending to the right.
