Mr. Bill Nittler
603 West 1st St.
McCook, Nebraska 69001

Dear Bill:

Thanks for the reception report of WLBC AM radio on March 7, 1977. You caught me running the annual Proof of Performance! The transmitter was on 1 Kw at that time.

WLBC AM operates on 1340 Khz, non-directional antenna, with 1 Kw daytime power and 250 watts night time power, 19 hours a day. Programing is middle of the road format. In November 1976, the station celebrated its 50th anniversary and with the original owner still active in the station's operation.

This letter will confirm your reception of WLBC AM radio at 3:18AM to 3:39AM on March 7, 1977.

73.
Pat Finnegan
