Hi Bill!!

Thanks for the note telling that you heard us up there in McCook. Sorry we put you to so much trouble and expence to get our QSL, but get it you did. WE CAN VERRIFY ALL ITEMS ON YOUR RECEPTION REPORT AS BEING BROADCAST ON KFLA AM RADIO BETWEEN 1:30 AND 1:50 PM ON DECEMBER 4, 1975.

KFLA is lisenced for broadcast at 500 Watts, however due to a recent change in tower hight puting a limit on our signal strength, our actual power is 412 Watts. Total antena hight is 408 FEET SERIES FED.

MERRY CHRISTMAS

C.E. Claude Van Horn

P.S. For your Christmas preðent, I enclose a coverage map.
