

March 3, 1964

Mr. Maurice W. Nittler
4590 So. Julian St.
Englewood, Colorado

Dear Mr. Nittler:

This is a letter of verification for your report of reception of KNBI on March 1, 1964.

KNBI began operations Monday, October 28, 1963. We operate on 1530 kilocycles with 1000 watts of power, non-directional day-time only. Collins and Ampex equipment is used exclusively in the control room. Our transmitter is a Collins 207V-3 1000/500 watter. Antenna height (overall) is 163 feet.

We were pleased to hear from you and thank you for your interest. We're sorry we can't send you a KNBI coverage map, but they aren't available at this time.

Sincerely,

Ed Briley
Program Director
