Mr. Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Maurice:

Glad that you were able to pick me up. I kinda looked forward to hearing from. I told one of the boys here that I should get a report from Geneva. I didn't more get the workds out until Bill walked in with your letter.

Anyway this letter is to verify that the station you heard was KRSL in Russell, Kansas.

We are not getting the reports like we did in York. I think it is because of a mexican station. I think he goes off around two in the morning.

Hope you can come down to Russell in the near futher. I will be out of town this Sunday, but expect to be here for a lot of Sundays after that.

Hav'ent heard from your Buddy in Omaha. Hope he can pick the station up begore the equipment tests are over. They will be able to measure our frequency in the daytime, so I won't have to fire up at night, unless I have to check the Gadgets.

Thanks again for your report and I will be see'nn ya in the near future.

Regards,

Mel
