

March 25, 1976

KSEK/KMRJ

Bill Nittler
603 W. 1st
McCook, NE 69001

Dear Sir:

Thank you for your reception report on Sunday March 22, 1976.

KSEK recently constructed a 5/8ths wave length tower. This has the effect of lowering the field of radiation, making long distance reception more likely.

The enclosed station brochure may be of little interest to you except for the coverage maps.

Thank you for listening.

Sincerely yours,

Tami Sutton
