Louisville, Oct. 22, 1956

Mr. Maurice W. Nittler  
Geneva, Neb.

Dear Mr. Nittler

This will confirm your reception of WLOU during our test period on October 11th.

WLOU has been on the air since November 1948, the tower is 293' overall and grounded being fed with what we call a multiple folded unipole, which is a type of shunt feed, the antenna tower is topped by a 5-bay G.E. UHF TV antenna for Channel 41.

Application has been made for an increase in power to five thousand watts, now before the FCC.

WLOU operates daytime only. Thanks for your report.

Sincerely Yours;

Steve Dawson Chief Engineer WLOU
