HOUMA, LOUISIANA

December 27, 1954

Mr. Maurice W. Nittler  
Box 94  
Geneva, Nebraska

Dear Mr. Nittler:

This is to acknowledge your DX report of our signal the night of December 22, 1954, during a frequency check with the Commercial radio Monitoring Company of Kansas City, Missouri.

We have in operation the Gates C-1 transmitter, 250 watts. I was happy to receive your report and also that of DX'er John Sampson of Omaha, who also received our signal. Recently I put into operation a new Gates limiter and from the reports it evidently ~~is~~ is helping us maintain a higher percentage of modulation. We always experience severe interference with WLOX of Biloxi, Mississippi, who happen to have their tower sitting in the Gulf.

Once again our many thanks for your report, and may this Christmas season be your most joyous, and the best of luck.

Sincerely,

A handwritten signature in blue ink that reads 'H. E. Herron'. The signature is written in a cursive, flowing style.

H. E. Herron  
Chief Engineer
