

KEEL

A McLENDON STATION

10,000 WATTS DAY ★ 5,000 WATTS NIGHT ★ 710 KILOCYCLES ★ 1500 N. MARKET ★ SHREVEPORT, LA.

Dec. 26, 1957

Mr. Maurice W. Nittler
2818 South Cherokee
Englewood, Colorado

Dear Sir:

We are very happy to verify your report on the reception of KEEL in Englewood. Your report checks with our program log.

We operate with 10 KW and a four tower directional array in the daytime and 5 KW with a six tower directional array after local sunset. Two-thirds of the power is directed south in the daytime and all power is directed south at night.

We have been getting a good deal of mail from members of "The National Radio Club" lately and appreciate your report very much.

Yours truly,

R. C. Johnson, Jr.
Chief Engineer
