Gentlemen:

Thank you for your report in hearing our station on our recent frequency check.

Your information is correct, according to our transmitter log. Our frequency checks are heard monthly at approximately the same time.

Our transmitter is a Bauer Model #707 which delivers 1000 watts into a 72-ohm load at 1530 KC. The antenna is a 186' vertical tower which is slightly longer than 1/4 wave at equally spaced copper radials 165' long plus a 50' by 50' copper ground screen. The geographical coordinates of our tower are 31° 34' 30.6" North Latitude and 93° 29' 46.4" West Longitude.

Enclosed is our coverage map and, again, thank you for your interest in our station, and we will always be interested in hearing from you.

Cordially I remain,

Radio Station KWLA
