November 6, 1987

Mr. Bill Nittler
Box 824
Mancos, Colorado
81328

Hello:

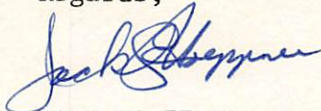

Thank you for your October 24th report of receiving CISV.

This will confirm that you were receiving our signal. At the same time, let me also advise you that this will be one of the last reception reports for CISV on 1530 KHZ.

On November 9, 1987, CISV will change frequency and power to 1570 KHZ at 10,000 watts.

Keep listening.

Regards,

JACK HOEPPNER
Director of Engineering
