

1050 ON YOUR DIAL

1000 WATTS

April 16, 1956

Mr. Maurice W. Nittler,
Box 94,
Geneva, Nebraska.

Dear Sir:

We're sorry to be so tardy in replying to your letter. But finally it was delegated to me, due to other commitments just didn't seem to get the time.

First of all we were happy to hear from you and are sincerely sorry that you had trouble picking us up however you did log a great deal of the program and this letter will confirm that it was Radio Station C.K.D.M. that you heard from 2 A.M. to 4 A.M. (CST) Monday January 23 --with a power of 250 watts on a frequency of 1050 Kilocycles.

Its to bad XEG gave so much trouble. We hope We'll be hearing from you in our next DX Broadcast and we'll try to be a little faster with the reply.

Yours sincerely,

H.W. Thomas,
Technician.
