

Radio Station WPGC
4421 Southern Ave S.E.
Washington ,19, D.C.

April 13 1962

Maurice W. Mittler
1755 So. Vallejo St.
Denver, Colorado

Dear DX'er ,

We are pleased to confirm your reception of Radio Station WPGC broadcasting on

April 1 1962 from 2.57AM to 3.23.30. AM

WPGC studios are located at Bradbury Heights , Maryland. This is at the southeast boundry line that seperates Washington D.C. and the state of Maryland.

WPGC transmitter is located at Oakland , Maryland. This is one mile east of the WPGC studios.

The WPGC transmitter is a Radio Corporation of America , Type BTA-10H. Our antenna system consists of two vertical , uniform cross-section , guyed , series excited steel towers. These towers are 165 feet (or 95.5 electrical degrees on 1580 Kc.) high. They are spaced 233.45 feet (or 135 electrical degrees on 1580 Kc.) from each other on a line bearing 20 degrees from true north. Our maximum signal is beamed 130 degrees from true north.

Sincerely Yours,

George R. Banner Jr.
Chief Engineer WPEC Inc.
