January 6, 1969

Mr. Bill Nittler  
P.O. Box 112  
Englewood, Colorado  
80110

Dear Mr. Nittler:

This letter will verify your reception of KATE Radio at 1:00 A-M CST on January 2, 1969 on 1450 kc., with 250 watts nighttime power. The transmitter in use at the time was a Collins 20V-3 feeding a quarter-wave vertical antenna (non-directional).

We have enclosed a copy of our program schedule and other market information that you may find interesting. Since the schedule was printed, we have moved our evening sign-off to 1:01 A-M on a six-nights-a-week basis.

Thank you very much for your reception report. Although we can't guarantee daily service to Englewood, it's nice to know that KATE is "getting out." Best wishes for your continued success in 1969.

Yours truly,

Paul Kero  
Program Director
