Dear Sir:

This is to confirm your report of our frequency check January 6, 1954. We usually have our frequency checks on the first Friday of each month from 1:00-1:30 a.m. so if you'd care to check again sometime that is the time.

We have a complete Gates Set-up here. The console, limiter, transmitter and even the turntable is Gates. The transmitter is a Gates 250GY modified to 100 watts and we use a 150 foot, guyed, Non-Directional antenna.

Yours truly,
Dick L. Beekman
Dick L. Beekman,

C.E.

P.S. I lost your letter for awhile so please excuse the delay.
