Maurice W. Wittler
Denver, Colorado

It was very foggy at Morris
the morning of August 28...and your tuning into KMRS
appears to be accurate.

Let's hope XERF is off the air
for good. We did not know they were off for an extended
period of time. But we ran a night test about two
weeks ago. We were picked up on the gulf and on the
east coast and several mentioned XERF was off the air at
that time.

Yours truly,
