Dear Bill:

This is to verify that the station you heard Monday, May 26, 1969, from 3:45 to 3:53 a.m., central daylight time, was definitely that of KNUJ, 860 kHz., in New Ulm, Minnesota with 1000 watts.

Several other people have mentioned interference from KONO in San Antonio. That must have been the only other station at the testing hour.

Thanks for writing.

Sincerely,
