Maurice W. Nittler
Box 94
Geneva, Nebraska.

Dear Maurice;

I was very happy to hear that you have logged us up in Geneva, several other DX'ers have had some good luck with us up in your area, and have had two reports from Canada since we've been on the air.

We have a better signal north of here most of the time than X E G has, even with them running all that power. We recently celebrated our 1st. birthday and so the newness has not quite worn off of the equipment yet, and it still makes us feel good to receive DX reports if at any time in the future you should hear us again we would appreciate you dropping us a card.

Yours to lots of good DXing in the Future,

Don Warnock,

Chief Engineer.
