Mr. Bill Nittler
603 W. 1st
McCook, Neb. 69001

7 Feb 1976

Dear Bill,

This will confirm your reception report of this station 0200-0216 on 2 Feb 1976. The test program consisted of live ID's, alternate 1000 hz and 400 hz tones, regular taped ID's, and once I had to put on a record while I answered the phone for some members of your club.

At some later date, we may again help out with a test. As I wrote Skip, I conduct routine frequency checks with the Lee's Summit monitoring service the 2nd Sunday of each month, sometime between the hours of 0015 and 0100, dependent on their scheduling.

Sincerely,

Bob Woods

R. L. Woods
