

KLTZ

GLASGOW, MONTANA

Maurice W. Nittler
2818 So. Cherokee
Englewood, Colorado

Maurice;

Fine Business on picking up our one thousand cycle tone and IDs. The Station was on the air at that time for our monthly freq. check for the freq. Monitor at Kansas City. It was on from 1:55 to 2:05 MST. And of coarse 1240 Kc.

At the present time our station is running 250 watts and our Xmitter is home-brew.

Happy to send to you this conformation, thanks much.

I am including the card on which I was informed of the time and date on which I was to have our check. Also I am a ham opperator and am including my personal card. At the present time I am operation portable from Glasgow.

If you should happen to fan the Ham bands and hear me on or better yet should you join your Amatuer fraternity give me a shout.
